ASSOCIATE EDITORS

Orville Baldos, Robert D Cox, R Kasten Dumroese, Joel Gramling, Diane Haase, Heidi Kratsch, Jessica Lubell-Brand, Matthew Madsen, James Muir, Keith Pawelek, Deborah L Rogers, Larry Rupp, Daniela J Shebitz, Steven E Smith, Jean-Marie Sobze, Mack Thetford

All papers undergo peer review.

See Author Guidelines for details on types of manuscripts.

Authors are responsible for content and accuracy of their articles. All views and conclusions are those of the authors of the articles and not necessarily those of the editorial staff or the University of Wisconsin Press. Trade names are used for the information and convenience of the reader, and do not imply endorsement or preferential treatment by the University of Wisconsin or any other public agency. The University of Wisconsin is an equal opportunity and affirmative action employer and educational institution. Native Plants Journal publishes research involving pesticides, but such pesticides are not recommended. All uses of pesticides must be registered by appropriate state and/or federal agencies before they can be recommended. Pesticides can injure humans, domestic animals, desirable plants, and fish or other wildlife if improperly handled or applied. Read the pesticide label before purchasing, and use pesticides selectively and carefully. Follow label directions for disposal of surplus pesticides and pesticide containers.

CORRESPONDENCE

Manuscripts must be submitted via the Internet. See the final pages of each issue for complete author instructions or visit <http://bit.ly/npjsubs>. Address all subscription, business, back issue, bulk order, and advertising inquiries to:

University of Wisconsin Press Journals Division
728 State Street, Suite 443
Madison, WI 53706-1418 USA
608.263.0668 uwpress.wisc.edu/journals

SUBSCRIPTIONS

Subscription rates are:

Institutions

US\$ 210 print and electronic

US\$ 179 electronic only

Individuals

US\$ 74 print and electronic

US\$ 63 electronic only

Foreign postage is \$31.

PERMISSION TO REPRINT

No part of this publication may be reproduced, stored in a retrieval system, transmitted, or distributed, in any form, by any means electronic, mechanical, photographic, or otherwise, without the prior permission of the University of Wisconsin Press. Over the years, our associate editors (AEs) have been specifically invited to work on the NPJ team. Their efforts, which are voluntary, provide an irreplaceable service to both the journal and the authors. Their primary job is to manage the review process from beginning to end—paper by paper. Plus, they often provide useful and creative suggestions for improving manuscript quality. Right now we have an outstanding group of associate editors. In a world where peers are recalcitrant to take on review assignments, the NPJ AEs manage to chase down the two necessary individuals to review each respective paper. Often, it entails making dozens of contacts. They don't let frustration daunt them. Along with a few new appointees, this group has stayed loyal and effective for many years.

I tell you this not only to thank them but also to say that currently I am dealing with some serious health issues. I suspect this will take me out of full participation in journal activities for as long as six months. Knowing this was coming, I leaned on some of these AEs to complete some of my tasks. I also recently asked AEs to do tasks that are outside their described duties. They accepted these new roles and are fulfilling them with superior professionalism.

It's worth repeating: I can't thank these people enough, but I will try: *THANK YOU, THANK YOU, THANK YOU!* If you personally know any of these AEs, you might take a moment to thank them yourself. The names of the current team are listed on this page, near the top of the left column.

We have created a unique journal with a broad range of subject matter, of genre both scientific and practical. As a result, we have a large but unorthodox readership—an audience left unserved by most other conservation and restoration journals. So, let's continue to make our journal of value. Please continue to send in your articles.

Dr Stephen L Love
Editor-in-Chief
