ANNOUNCEMENT

## Leonardo Book Series

The arts, sciences and technology are experiencing a period of profound change. Explosive challenges to the institutions and practices of engineering, art-making and scientific research raise urgent questions of ethics, craft and care for the planet and its inhabitants. Unforeseen forms of beauty and understanding are possible, but so too are unexpected risks and threats. The Leonardo Book Series, published by The MIT Press, aims to consider these opportunities, changes and challenges in books that are both timely and of enduring value.

Proposals that address these challenges in terms of theory, research and practice, education, historical scholarship, discipline summaries and experimental texts will be considered. Single-authored books are particularly encouraged.

*Full book proposal submission guidelines:* leonardo.info/authors-books.

Inquiries and proposals should be submitted to **both**:
