Irrealis is real: Supplementary Material

Kilu von Prince, Ana Krajinović, Manfred Krifka

<MUSE: Here is the text for the von Prince et al. supplemental files. >

98.2.vonprince01_supp01.zip

[Download ZIP file] Supplements

The following supplements are included in the .zip file:

Files:
- BibliographySupplement.txt: Provides bibliographic references in .bib format. References in the other files use cite keys to this file.
- Binary.txt: Values for languages depending on whether they have a binary realis/irrealis distinction.
- Directives.txt: Strategies for forming directives.
- Negation.txt: Interference of negation with mood.

Columns: Each file minimally has the following columns:
- Name: the language name
- Glotto: the glotto code for the language, if available
- Source: a reference to the cite keys in the file BibliographySupplement.txt.

Each file has an additional column listing the values for the study it represents. These are described in each file.

The files Binary.txt and Negation.txt also include coordinates for each language, taken from glottolog.
