BORDERLANDS

GOVERNANCE SERIES

Governance is the process of effective coordination whereby an organization or a system guides itself when resources, power, and information are widely distributed. Studying governance means probing the pattern of rights and obligations that underpins organizations and social systems; understanding how they coordinate their parallel activities and maintain their coherence; exploring the sources of dysfunction; and suggesting ways to redesign organizations whose governance is in need of repair.

The Series welcomes a range of contributions—from conceptual and theoretical reflections, ethnographic and case studies, and proceedings of conferences and symposia, to works of a very practical nature—that deal with problems or issues on the governance front. The Series publishes works both in French and in English.

The Governance Series is part of the publications division of the Program on Governance and Public Management at the School of Political Studies. Nine volumes have previously been published within this series. The Program on Governance and Public Management also publishes electronic journals: the quarterly www.optimumonline.ca and the biannual www.revuegouvernance.ca
