INDEX

Page numbers in italics refer to figures and tables.

- activity cages, use of, 30, 31, 74
ADH (vasopressin) secretion, 55
adrenal glands
 atropine and sweating, 109
 biological clocks and spontaneous behaviors, 35–37
 domestication, effects of, 79, 79–81, 92–94, 94, 96
 sodium and water regulation, 55–59, 56, 62–64, 133
Agassiz, Louis, 27
aging, Richter's interest in biological basis of, 138
alcohol consumption and homeostasis, 71–73
American Philosophical Society, 22–23
Angell, J. R., 12
animal experimentation, concerns regarding, 12, 148n1 (chap. 4)
Aristotle, 27
art, medical (Richter-Malone collaboration on rat surgery book), 121–27, 123, 124, 125, 126
artisan in laboratory, Richter as, 116, 127–28
 see also science and laboratory research, culture of
Aschoff, J., 40, 41, 45, 46
atropine and sweating, 109

bait shyness and taste aversion, 69–70, 80, 81–88, 87
Barelare, Bruno, 64, 66, 118, 119
Baron, Jon, xi

Barro Colorado research station, Panama, 101, 102, 114–15
Bartemeier, L. H., 105, 106
Beach, Frank, 134, 143
beavers, decerebration of, 107
behaviorism, 13, 27, 30, 52, 133–35, 147n2 (chap. 1)
Bernard, Claude
 biological clocks and spontaneous behaviors, 29, 147–48n1 (chap. 3)
 influence on Richter, 2–3, 4, 10, 24, 135
 ingestive behaviors, study of, 47, 48, 50, 54, 59, 148n2 (chap. 3)
 laboratory notes of, 148n1 (epil.)
 laboratory sensibility of Richter compared to, 120
 Magendie as teacher of, 48, 78, 116
 “big phenomena,” ix–xi
biological clocks and spontaneous behaviors, 26–46
 circadian clock, 38–42, 39, 75
 clinical applications, 43, 45–46
 endocrinology, behavioral, 34–37
 fire, discovery of, 41–42
 innovation in research practices, 30–33, 31
 internally generated behaviors, 29–30
 multiple clocks, existence of, 40–41, 45
 peripheralist perspective, 33–34, 45
 psychobiology and biological clocks, 28–29
 shock-phase hypothesis and periodic phenomena, 42–43, 43

- biological clocks and spontaneous behaviors
(*continued*)
stomach contractions, 33–34
temperature, behavioral regulation of,
37–38
- Blass, Eliot, xii, 162
- Boyle, Robert, 116
- Brady, Joe, 144
- Brödel, Max, 121–22, 123
- Brunner, Peg, 120
- bulbocapnine, catalepsy induced by, 107
- Bump, Jesse, 146
- calcium homeostasis, 60–62, 61
- Cannon, Walter
biological clocks and spontaneous behaviors, 34, 44
influence on Richter, 2–3, 4, 10, 135
ingestive behaviors, study of, 47, 48–50,
55, 59, 60, 73–74
Richter as scientific figure compared to,
121, 129, 143, 146
voodoo death and effects of domestication,
89, 90, 92, 94, 96
“wisdom of the body,” 48–50, 117
- Carmichel, Leonard, 23
- Cartesian thought, 27
- catalepsy induced by bulbocapnine, 107
- catatonia, 43, 114
- cats, study of, 111
- Chapman, F. M., 114
- chorda tympani nerve and salt taste, 59
- chronobiology, 45
see also biological clocks and spontaneous behaviors
- circadian clock, 38–42, 39, 75
- clinical applications
biological clocks and spontaneous behaviors, 43, 45–46
ingestive behaviors, 59, 62–64
military research on taste aversion and poisoning wild rats, 8–85, 95
neurobiological investigations, 101, 109
skin resistance, electrical measurement of, 109, 111, 112–14
- Clisby, Kathryn, 82
- clocks, biological. *See* biological clocks and spontaneous behaviors
- clocks and locks, Richter’s youthful tinkering with, 8, 26
- coaimundis, study of, 102, 103
- cognitive behaviorism, 147n2 (chap. 1)
- colleagues of Richter, 118–19
- Columbia University, 33
- Commonwealth Fund, 137
- core concepts, Richter’s use of, 4–6, 142–43
- Cross, Barbara Carberry, 120
- Cushing, Harvey, 121
- cyberconference on Richter, 145–46
- Darwin, Charles
biological clocks and spontaneous behaviors, 27, 41
domestication, on effects of, xv, 77–78,
93, 96
influence on Richter, 4, 5, 20–21, 135
ingestive behaviors, study of, 47, 50–51
instinct, 50–51
- da Vinci, Leonardo, 122, 127
- Davis, Clara, 53–54, 59, 67
- decerebration, motor rigidity produced by,
105–6, 106, 107
- Denny-Brown, Derek Ernst, 106
- Denton, Derek, xiv, 141
- deoxycorticosterone, 57, 58, 81, 133
- dermometer, 110, 112, 115
- Descartes, René, 27
- design research, Richter’s resistance to,
136–37
- determinism, 29
- Dethier, V. G., 143
- Dewey, John, 19–20, 147n2 (chap. 1)
- diabetes and ingestive behaviors, 55, 57,
62–64
- Dieke, Sally, 84, 118, 119
- domestication, effects of, 77–98
adrenal glands, 79, 79–81, 92–94, 94, 96
Darwin on, xv, 77–78, 93, 96
early experiments in, 79–80
gonadal organs, 93, 94, 96
instinct and, 51
learned behavior, taste aversion as, 87–88
Lorenz on, 133
organ weights, 94
pituitary gland, 94
rats as study animals, 78–79

- reproductive capacity, 93, 96
 Richter's conclusions regarding, 93–98
 sodium self-regulation, 80–81
 spontaneous running, 94
 taste aversion and bait shyness, 80, 81–88
 temperamental variance, 78, 88–89, 95
 tongue size, 85
 voodoo death, 89–93
 Donaldson, Henry H., 12, 78, 96
 Dresden Technische Hochschule, 7, 9
 Dunlap, Knight, 13, 52
- Eaton, B. C., 112
 Eckert, John, 118
 Eckman, M., 120
 ecological perspective, 75, 76
 Edwards, Jonathan, 23
 electrical measurement of skin resistance,
 108–14, 110
 electromyogram (EMG), use of, 107, 108
 Emlen, J. T., Jr., 84
 endocrinology, behavioral, 34–37
 “energies of men” (William James), 89
 engineering
 biological clocks and spontaneous behav-
 iours, design of, 29
 Richter's tendency to think like an engi-
 neer, 1, 6, 136
 Richter's training in, 8–9
 Epstein, Alan, x, xi, xiii
 esthetic sensibility, origins of, 127–28
 ethological perspective, 6, 75, 76, 134, 135
 evolution, Richter's views on, 41–42, 93,
 96–98
 Evvard, J. M., 53, 74
 experimental design, Richter's resistance to,
 136–37
- fear and hopelessness, sudden death from
 (voodoo death), 89–93
 feces ingestion by rats, 65
 Fechner, Gustav Theodor, 109
 fire, circadian clock and discovery of, 41–42
 Fleischmann, Walter, 62–64
 Flexner, Abraham, and Flexner Report, 3,
 147nn1–2 (intro.)
 Flexner, Louis, 147n2 (intro.)
 Flexner, Simon, 23, 147n2 (intro.)
- Fontaine, M., 133
 food choice. *See* ingestive behaviors
 Franklin, Benjamin, 23
 Freud, Sigmund, 9, 15, 28, 76
- Galison, P., 117, 146
 galvanometer, 109
 Gantt, W. H., 92

Jay Schulkin received his Ph.D. from the University of Pennsylvania. He is a research professor of physiology and biophysics at the Georgetown University School of Medicine, senior research associate at the Clinical Neuroendocrinology Branch at the National Institute of Mental Health, and the director of research at the American College of Obstetricians and Gynecologists. Dr. Schulkin is the author of eight books, including *Sodium Hunger*, and the editor of three. His research interests include the neuroendocrine regulation of appetitive behavior and fear.
