***CAPITALISM: A JOURNAL OF HISTORY AND ECONOMICS***

offers a trans-disciplinary forum for the examination of the history of economic phenomena broadly conceived. It features original and peer-reviewed contributions by authors from across the humanities and social sciences on the historical dimensions of markets, capitalism, political economy, and economic thought. It is also interested in how economic questions interact with those of power, knowledge, race, class, and gender, as well as the interplay between the environment and the economy, in any region of the world. The journal aims to publish canon-questioning research that challenges and denaturalizes existing categories and modes of analysis.
