EXECUTIVE ASSISTANT
Maria Cox, University of Illinois Urbana-Champaign, USA

HUMAN BIOLOGY is published four times a year by Wayne State University Press. The publication of Human Biology is supported in part by the Subtotal Leader Fund at Wayne State University.

SUBSCRIPTION RATES & INFORMATION
Institutions: $225.00 per year
Individuals: $65.00 per year
Students/Seniors: $40.00 per year

Please make checks payable to Wayne State University Press. All foreign checks must be payable in U.S. dollars. Payment must be in U.S. dollars on a U.S. bank, covering all bank charges and any expenses to us. Visa and MasterCard are also accepted as payment. Canadian and foreign subscribers, please add $60.00 per year for Airmail postage and handling.

Subscribers should notify the publishers of change of address at least four weeks before publication of the issue with which the change is to take effect. No claim for non-receipt of an issue will be considered unless made immediately upon receipt and handling.

For questions regarding subscription information and/or order fulfillment, please contact 1-800-WSU-READ or the journal executive editor is based largely on the abstract as possible. For examples please refer to the Literature Cited section. Each reference in the Literature Cited should include as much information as possible. For examples please refer to the Literature Cited section. Each reference in the Literature Cited should include as much information as possible.

Instructions for Contributors

EDITORS’ FOCUS

Human Biology publishes original scientific articles, brief communications, letters to the editor, replies and reviews articles on the general topic of biological anthropology. Our main focus is understanding human biological variation and human evolution through a broad range of approaches.

Alumnus who was accepted and an issue assigned, it will be reviewed by at least two external reviewers and offered as a “co-authors’” manuscript. Manuscripts are also encouraged. Any computational approach intended to summarize cultural variation is encouraged. Studies that are essentially descriptive or concern only a limited geographic area are acceptable only when they have a wider relevance to understanding human biological variation.

SUBMISSIONS TO MANUSCRIPT

Manuscripts should be submitted via the Human Biology Digital Commons site, http://digitalcommons.wayne.edu/humbio/.

REVIEWED REVIEWS

Books produced by North American and international publishers should be sent for review to Ripan Malhi, Department of Anthropology, 607 S Matthews Ave., M/C 148, Urbana, IL 61801.

Figure captions are typeset, they should not be used to proofread the figures. Color images are considered part of the illustrations. They should be a list of figure captions. Because the journal. WSU Press will coordinate payment as a general. The first page should be a title page, including the title of the paper, author’s names, complete author affiliations, and key words.

The second page should contain the abstract of the paper (500 words maximum). The manuscript should be double-spaced throughout, including the author affiliations, the literature cited, the figure captions, and the tables. The manuscript should be submitted as a separate file according to the style of the journal.

The figures, charts, and photos should be submitted in your Microsoft Word document. All figures should be sent as separate files according to the specifications below. Images obtained from websites or PowerPoint presentations are not suitable for reproduction.

The style of the Human Biology Maps section should include Littauer et al., 2003, “Maps,” J. Hum. Genet. 49:1 (2003). Photographers should be sent as separate files for the above). Please make sure that legends, axes, and other text elements are sufficient to be read. When submitting figures, the journal layout.

STYLES

The style of the Human Biology Genetics and Genomics; ancient DNA studies and disciplines, once the anthropological focus is approached. Studies that are essentially descriptive or concern only a limited geographic area are acceptable only when they have a wider relevance to understanding human biological variation.
