

The Journal of Developing Areas (JDA)
(JDA) US ISSN: 0022-037X
Online ISSN: 1548-2278

ABSTRACTING AND INDEXING AND THE IMPACT FACTOR

Through Project MUSE of Johns Hopkins University Press alone, currently JDA is being subscribed by more than 1,900 major libraries around the world. Many other libraries have access to JDA via JSTOR, ProQuest, EbscoHost and Cengage. Our journal is also indexed by Google, Google Scholar, Dgruyter's IBZ, & IBR and Cabell. JDA is also included in Excellence in Research for Australia (ERA), SCImago and in many other indexes of the world. It is also available on Research Gate, Zetoc List of Journals, Norwegian Register for Scientific Journals, EconLit of American Economic Review, SUNY-Oswego Journals List. Journal of Developing Areas has been rated by Anne-Harzig Journals Quality List and ABS (British Business Schools List) - as 'B', and '1*' respectively. It may have been rated by other agencies beyond our knowledge.

In 2014, JDA joined RePEc (<https://ideas.repec.org/s/jda/journal.html>), one of the largest Online open bibliographies on Economics and Business disciplines. This Web-portal includes more than 4,700 business journals. Tens of millions of scholars from all over the world visit this platform every year. When JDA became a part of RePEc, its impact factor was as low as 0.16. At the end of 2019, it went up to 0.73. In the future, this number is expected to rise gradually and steadily. Present impact factor of JDA means that, on average, out of every 4 papers published in it, about 3 of them are being cited by other RePEc journals.
