Academy of Natural Sciences of Philadelphia, 24
Agassiz, Louis, 47, 75; death of, 154; early efforts with professionalization of science, 62, 64, 67; evolution debates with Rogers, 49–55, 131, 172–152; Harvard and, 156; land-grant funds and, 111–13; Lawrence Scientific School and, 80, 83, 134; Museum of Comparative Zoology and, 92–93, 110, 113–16, 172; National Academy of Sciences and, 107, 109
Albany, NY, 34, 66, 88
Alexander, Stephen, 108
Allen, Zachariah, 84
American Academy of Arts and Sciences: Jacob Bigelow and, 127; evolution debates at, 51–52; Lazzaroni and, 109; MIT and, 98; as model for American Association for the Advancement of Science, 58
American Association for the Advancement of Science, 109, 154; early years of, 62–70, 106; Rogers elected president of, 151. See also American Association for the Advancement of Science; Association of American Geologists and Naturalists
American Journal of Science, 72
American Medical Association, 12
American Philosophical Society, 3, 12, 24, 58
American Social Science Association, 106–7
Amherst College, 58
Andrew, John A.: land-grant funds and, 111–16; MIT incorporation and, 99–100; selected Rogers for Massachusetts state appointment, 102, 104
Appalachian Mountains: Rogers’s geological research on, 42–44, 59–60, 63; Virginia politics and, 23
Ann Arbor, MI, 88
Association of American Geologists, 58. See also American Association for the Advancement of Science; Association of American Geologists and Naturalists
Association of American Geologists and Naturalists, 24, 106; name changes to and expansion of, 59–62; Rogers’s mountain chain formation theory and, 43. See also American Association for the Advancement of Science; Association of American Geologists
Atkinson, Edward: technological institutes and, 136; views on coeducation at MIT, 142–43
Atkinson, William P.: appointment to MIT faculty, 121; reception of MIT and, 127–30, 151
Atlantic Monthly: Charles W. Eliot’s “New Education” described in, 134; coeducation at MIT discussed in, 142; T. W. Higginson on education in, 126; Walker-Shaler debates over technological institutes in, 156
Bache, Alexander Dallas: American Association for the Advancement of Science controversies, 65–70; death of, 154; Franklin Institute and, 34; higher education views of, 88; National Academy of Sciences and, 107–9, 150; offers position to Rogers, 22; United States Coast Survey and, 37, 58
Back Bay, ix, xiii; education and land use policy of, 89; Samuel Kneeland, Jr.'s proposal for use of, 90–91; MIT construction on, 121–23; Rogers's conservatory proposal for use of, 91–93; Rogers's MIT proposal for use of, 93–100
Bacon, Francis, 32
Baconian science, 32, 189n25; William Maclure and, 33; Rogers's approach to, 33, 39, 55, 153
Baird, Spencer, 108–9
Baltimore, MD, 1; Rogers family and, 6–8, 10–11; Rogers's Maryland Institute appointment in, 13–16
Banks, Nathaniel P., 89
Bartlett, W. H. C., 69
Barton, Benjamin Smith, 4
Berthier, Pierre, 35
Bigelow, Jacob, 133, 154; reception of MIT and, 127–30, 132, 151
Blake, William P., 97
Blythe, Hannah, 4–5
Bocher, Ferdinand, 121
Bond, George P., 108
Bonnycastle, Charles, 75
Boston, MA, ix–xi, xiii; Bigelow and, 127; MIT location and first classes in, 121, 147; Navy Yard and practical instruction in, 144; philanthropy and, 81, 83, 110, 117, 142; professional meetings in, 62, 109; Rogers's arrival in, 89; Rogers's early educational reform proposals for philanthropists in, 86; Rogers's health in, 124; Rogers's Massachusetts state appointment in, 103, 105; Savage family of, 31; societies of, 151; University of Massachusetts system and, 116. See also Back Bay
Boston Board of Trade, 98
Boston Society of Natural History: conservatory proposals and, 90, 92; Rogers-Agassiz evolution debates at, 52, 55; Rogers elected president of, 151; support for MIT and, 98; women and membership at, 141
Boutwell, George, 90, 93, 98
Bouve, Thomas T., 141
Boyd, George W., 42
Brainerd, Jehu, 65
Brande, William Thomas, 73–74
Brandes, Rudolph, 36
British Association for the Advancement of Science, 58–59, 62–63
British Copley Medal of the Royal Society, 27, 74
Brooklyn Polytechnic Institute, 88
Brown University: and Francis Wayland's Report of 1850, 84–85; reform at, 86
Browne, Peter, 37–38
Brush, George J., 150
Buchholz, Christian Friedrich, 36
Bullock, A. H., 104
Byrd, Charles, 19
Cabell, Joseph C., 23, 37
Cambridge, MA, xi; Louis Agassiz's MIT-Harvard merger proposal and, 115; Jacob Bigelow and, 127; Charles W. Eliot and, 146, 155; Asa Gray and, 50–51; Lazzaroni in, 67; Mount Auburn Cemetery in, 157; Rogers and the Lawrence School in, 83; supporters of MIT in, 110
Cambridge Science Club, 51
Cambridge University, 27
Carlisle, PA, 12
Carlton, W. T., 121
Centennial Exhibition of 1876, 144
Central Pacific Railroads, 150
Chadbourne, Paul Ansel, 126
Charles River, xi
Charleston, SC, 9–10
Charlottesville, VA: Rogers and science instruction in, 74; Rogers and Virginia politics in, 29–31; Rogers's arrival in, 26; student discipline and, 27–29; James Joseph Sylvester controversy in, 26–27; Francis Wayland visits Rogers in, 85
Chemical Society of Philadelphia, 3
Church of England, 7
Cincinnati College, 12
Citadel, 88
Civil War: land-grant funds and, 111; MIT's founding and, 101–2; National Academy of Sciences and, 107; Rogers's research during, 105, 149
Clarke, Edward, 140
classical studies, x, xii; advocates of, 125–27; William P. Atkinson on, 128–29; Jacob Bigelow on, 127–28; Brown University re-
forms of, 84–85; College of William and Mary and, 1, 73–74; expansion of science and, 71–73, 79; Henry Darwin Rogers on, 12; reaction to Bigelow-Atkinson addresses on, 129–30; Rogers’s education in, 9; Rogers’s Maryland Institute appointment and, 14–15; Rogers’s “School of Arts” response to, 77–79; Rogers’s view of MIT and, 130–32; scientists and, 132–34, 136; Benjamin Rush’s views on, 4; separate schools and, 80, 134–35; traditional college curriculum and, 2, 5, 14; University of Virginia and, 74–76; Yale Report of 1828 and, 76–77
Cocke, John Hartwell, 26
coeducation: MIT and, 140–43; Rogers’s “Polytechnic School” proposal and, 82
College of Philadelphia, 3–4
College of William and Mary, x, xv; Rogers family and, 6–13; Rogers’s approach to science instruction at, 73–74, 76; Rogers’s faculty appointment at, 16; Rogers’s studies at, 1, 131; Rogers’s tenure at, 17–22, 138
Columbia, SC, 22
Columbia University, 5, 27, 73
Columbian Institute for the Promotion of Science, 58
Conservatoire des Arts et Metiers, 88–89, 96, 186n.41–42
Continental Monthly, 135
Cooke, Josiah, 107
Cooper, Thomas, 20
Cooper Union, 88
Cornell University: applied science at, 136; John D. Runkle and, 144; Robert Thurston and, 155; Andrew D. White and, 88
Corps of Engineers, 150
Crop, Charles R., 139
Cuvier, Georges, 50
Dabney, John A., 19
Dana, James D., 74, 108, 109, Dartmouth College, 73
Darwin, Charles, xii; death of, 153–54; Origin, 50–51; Rogers-Agassiz evolution debates and, 52–55; Rogers meets with, 62; Rogers’s views of, 93, 113
Darwin, Erasmus, 50
Darwinism, 55, 106, 115. See also Charles Darwin
Davis, John A. G., 27, 28
Day, Jeremiah, 76–77
De Butts, Elisha, 10, 13
De la Beche, Henry, 45, 63, 75
de Tocqueville, Alexis, 33
Department of Interior, 150
Dew, Thomas R., 20, 22
Dewey, Chester, 69
Dickinson College, 12, 73
Draper, John William, 108
Dublin, Ireland, 3
Eaton, Amos: antebellum geology and, 33–34, 36, 37; as Benjamin Silliman’s student, 72; Rensselaer School and, 87
Ecole Centrale de Arts et Manufactures, 88–89, 96
Ecole des Ponts et Chaussees, 121
Ecole Polytechnique, 86, 88–89
Edinburgh, Scotland, 120
Erie Canal, 34
Faraday, Michael, 46, 74
Farmer’s Register, 34–36
Featherstonhaugh, George, 34, 37
Federal Gazette, 4
Felton, Cornelius C., 83
Fisher, George Park, 126
Flaubert, Gustave, 4
Florentine Academy, 67. See also Lazzaroni
Floyd, John, 37
Franklin Institute, 88; James Blythe Rogers and, 12; early professionalization of science and, 58; influence on Maryland Institute, 13; Thomas P. Jones and, 8; Philadelphia geologists at, 34; Rogers visits, 15; Rogers’s “School of Arts” proposal and, 77–79
Gardiner Lyceum, 88
Garfield, James A., 152
Geoffroy Saint-Hilaire, Etienne, 50
Geological Society of London, 61
Geological Society of Pennsylvania, 37

Geological Survey of Virginia, xi; external interest in, 37–38; Thomas Ridgeway and Jed Hotchkiss use of, 148–49; Rogers’s appeal for, 38–39; Rogers’s approach to, 39–45, 115, 153; Rogers’s ideas about higher education and, 66, 72, 81–82, 131; Virginia politics and, 22–25; Rogers’s professionalization efforts and, 59–62, 106; role in Rogers-Agassiz evolution debates, 55

Gibbs, Wolcott, 67, 156

Girard College, 145

Gould, Benjamin A., 67, 75

Gray, Asa: evolution debates with Agassiz, 50–51; initial reception of Darwinism and, 55; National Academy of Sciences and, 108–109; Rogers’s death and, 153–154

Great Chain of Being, 50

Greene, Benjamin, 87

Grotthus-Draper Law, 108

Hall, G. Stanley, 140

Hammond, James Henry, 8, 20

Hare, Robert, 8

Harper’s Monthly, 135

Harvard University, xii, xv, 7; Louis Agassiz and, 49, 51, 53, 55; Louis Agassiz’s MIT-Harvard merger proposal, 111–116; antebellum college reform and, 72, 73; Jacob Bigelow and, 127; George Brush of, 150; Edward C. Clarke of, 140; Charles W. Eliot’s MIT-Harvard merger proposal, 146–148; enrollments and graduation rates at Lawrence Scientific School at, 137–138; Asa Gray and, 50, 154; land-grant funds and, 111–116; Ralph Huntington and, 110; Lawrence Scientific School at, 67, 71, 80, 83–84, 134–135; Abbot Lawrence’s gift to, 83–84; medical school of, 5; Museum of Comparative Zoology at, 92; Benjamin Peirce of, 98; Progressive era MIT-Harvard merger proposals, 157; Rogers’s influence on, 155; Henry Darwin Rogers and, 21; Rogers’s views of, 81, 89, 113, 131; John D. Runkle’s education at, 121; Walker-Shaler debates and, 156; William P. Atkinson and, 127

Harvard Bridge, xi

Hatchell, Charles, 36

Haynes, A. A., 102

Henry, Joseph: death of, 154; Lazzaroni and, 67; National Academy of Sciences and, 107–109, 149–150; recommends Rogers for a professorship at University of Virginia, 25–26

Hibernian Society, 6

Higgins, T. W., 126

Hill, Thomas, 114–115

Hitchock, Edward, 58–60, 69

Holmes, George Frederick, 8

Hooker, Joseph, 90

Hotchkiss, Jed, 149

Hovey, Marian, 142–143

Howison, George, 121

Humboldt, Alexander von, 32, 55

Humboldtian science: Rogers’s approach to, 32–33, 39, 55

Huntington, Ralph, 110

Hutton, James, 44

Illinois University, 144

James, William, 114

Jamestown, VA, 9

Jarves, James Jackson, 126

Jefferson, Thomas, xi; College of William and Mary and, 7; correspondence with Patrick Kerr Rogers, 6, 10; slavery issue and, 18; University of Virginia and, 26, 29, 31, 38

Jefferson Medical College, 13

Johns Hopkins University, xii, 27, 155

Jones, Thomas P., 8

Journal of Industrial Science and Art, 94

Kanawha Canal Company, 23

Karlsruhe Technical Academy, 88, 121

Kensington Museum, 96, 120

Kew Gardens, 50

Kingsley, James, 76–77

Kneedland, Samuel, 90–93

Kraitzir, Charles, 27

Lamarck, Jean Baptiste, 50

Lawrence, Abbot, 85

Lawrence Scientific School (Harvard): competition with MIT over land-grant funds, 111–116; Charles W. Eliot’s impressions of, 80, 134–135; Charles W. Eliot’s MIT-Harvard
proposal, 146–148; enrollments and graduation rates of, 137–138; founding and early years of, 67, 83; Benjamin Peirce and, 98; John D. Runkle’s education at, 121; Rogers’s perceptions of, 81, 131
Lazzaroni, xiii, 154; American Association for the Advancement of Science and, 67–70; National Academy of Sciences and, 107–109, 149; proposal for university in Albany by, 88
Le Conte, John, 156
Le Conte, Joseph, 134
Leland, Charles G., 135
Liebig, Justus,
Loomis, Elias, 108
Lovering, Joseph, 107
Lowell, John A., Jr., 81–83
Lowell, MA, 122
Lowell Institute, 81–82
Lyell, Charles, 44–45, 75; Association of American Geologists and Naturalists and, 60; Rogers’s geological research and, 63
Lyman, Theodore, 108
Maclure, William, 33–34
Madison, James, 7, 37
Mahan, Dennis Hart, 86
Manufacturer and Builder, 133–34
Marcou, Jules, 54–55
Marsh, O. C., 150
Maryland Institute: James Blythe Rogers and, 12; Rogers’s departure from, 17; Rogers’s lectureship at and contributions to, 1–2, 13–16
Maryland Medico-Chirurgical Society, 6
Massachusetts Charitable Mechanics’ Association, 98, 139
Massachusetts Conservatory of Art and Science, 90
Massachusetts Horticultural Society, 92
Massachusetts Institute of Technology: Act of Incorporation, 100; Louis Agassiz’s MIT-Harvard merger proposals, 112–116; Bigelow-Atkinson addresses and the reception of, 127–132; Civil War and incorporation of, 101–102; coeducation and, 140–143; contemporary standing of, xi; Charles W. Eliot’s MIT-Harvard merger proposals, 146–148; enrollments and graduation rates at, 137–138; facilities of, ix, 123; government established for, 110; Journal of Industrial Science and Art, 94; Morrill Act of 1862 (Land-Grant Act) and, 111–116, 117, 155; Museum of Industrial Art and Science, 94–95; place of in relation to European models of higher education, xii; Progressive era proposals for MIT-Harvard merger, 157; Rogers elected president of, 110, 152; Rogers’s approach to science and, xi, 37, 55, 154–155; Rogers’s death at, ix, 153; Rogers’s efforts rallying support for the incorporation of, 93–99; Rogers’s initial fundraising for, 109–110, 117; Rogers’s Objects and Plan of, 93–97, 99–100, 110, 116–117, 122–123, 131, 135; Rogers’s recruitment of faculty for, 120–123; Rogers’s Scope and Plan of, 117, 119–120, 122–123, 131; Runkle appointed president of, 124; Russian influences on, 144–146; Emma Savage and, 157; School of Industrial Science and Art, 95–96, 110, 117–123; School of Mechanic Arts, 145–146; scientific community and reception of, 132–136, 155–156; Society of Arts, 94, 110–113, 119; student culture at, 138–140; Francis Amasa Walker selected as president of, 152; Women’s Laboratory at MIT, 141–143
Mathematical Monthly, 121
McCosh, John, 155
Mechanics Institute, 97
Middlebury College, 73
Military Rebellion of 1836 (University of Virginia), 27–29
Mitchel, Ormsby M., 69
Monroe, James, 7
Morrill, Justin, 111
Morrill Land Grant Act of 1862, 111–17; 155
Morse, Edward S., 55
Morton, Samuel George, 34, 62
Mount Auburn Cemetery, 157
Museum of Comparative Zoology, xv; Agassiz and, 83; Lazzaroni and, 67; Massachusetts state support for, 92–93; Rogers’s conception of MIT and, 110, 113–16
Nashville, TN, 9
National Academy of Sciences, 107–9, 149–51
National Institution for the Promotion of Science, 24
*Naturphilosophie*, 50
Newberry, J. S., 108–9
Newcomb, Simon, 150
*New Englander*, 126, 129
New England Society, 98
New Haven, CT, 129
New England Society, 98
New Orleans, LA, 9–10
Newport, RI, 124
*New York Times*, 68
New York University, 108
*North American Review*, 129–30
Norwich Academy, 88
Ohio Geological Survey, 108
Oken, Lorenz, 50
Oliver, James E., 97
OpenCourseWare, xi
Patterson, Robert, 6
Peirce, Benjamin: American Association for the Advancement of Science and, 64; death of, 154; Lawrence Scientific School and, 121; Lazzaroni and, 67; National Academy of Sciences and, 109; supporter of Rogers’s MIT plan, 98
Pennsylvania Society for Promoting the Abolition of Slavery, 4
Philadelphia Medical College, 12
Polytechnic College of Pennsylvania, 88
Porter, Noah, 125–26
Princeton University: Stephen Alexander of, 108; Joseph Henry of, 25; Charles G. Leland and, 135; John McCosh and, 155; science at, 5
*Providence Journal*, 68
Redfield, William C., 62
Rensselaer, Stephen Van, 87
Rensselaer School, 87–88, 131
Rice, Thomas, 90
Richmond, VA, x; College of William and Mary considers moving to, 11; Rogers’s Virginia Geological Survey and, 24, 61–62; Edmund Ruffin and, 34; as state capitol, 7; Virginia Convention of 1829–1830 at, 20
Ridgeway, Thomas, 149
Ritchie, James, 97
Rochester, NY, 69
Rogers, Henry Darwin: birth of, 5; Boston and, 81; career summary of, 12; education-related efforts with William Barton Rogers, 13–15; efforts in professionalization of science, 58–64, 69, 149; Great Britain and, 103, 120; Harvard and, 21; in Maryland, 1, 11; role in Rogers-Agassiz evolution debates, 52; scientific research with William Barton Rogers, 25, 42–44, 45–46; state surveys and, 24; Francis Wayland and, 84, 85
Rogers, James Blythe: in Baltimore, 10; birth of, 5; career summary of, 11–12, 21; College of William and Mary and, 6; death of, 13
Rogers, Patrick Kerr, 2–3; appointment to faculty of and life at College of William and Mary, 6, 9–11; Hannah Blythe and, 4–5; correspondence with William Barton Rogers, 14–15; death of, 16; marriage of, 5; medical practice of, 5; summary of careers of sons, 11–13; at University of Pennsylvania, 3–4; Williamsburg, and, 7–8
Rogers, Robert Empie: birth of, 6; career summary of, 12–13; efforts with professionalization of science, 58–59, 149; in Philadelphia and William Barton Rogers’s health, 124; research with William Barton Rogers, 61; southern life and culture and, 21, 28; views on engineering and West Point, 86; views on William Barton Rogers’s teaching, 74
Rogers, William Barton: address at Williams College by, 48–49; Louis Agassiz’s MIT-Harvard merger proposal and, 112–16; American Association for the Advancement of Science and, 62–70; American Social Science Association and, 106–7; antebellum higher education reform and, 71–72, 79–81, 86–89; Association of American Geologists and Naturalists and, 59–62; Baconianism and, 33, 39, 53, 153; birth of, 5; book publications of, 46–48; Civil War and, 101–2; coeducation and, 140–43; conservatory proposal and, 91–93; contributions to Maryland Institute of, 13–16; differences in approach to science between Louis Agassiz and, 49; early efforts in the professionalization of science, 57–58; elected president of MIT, 110, 152; Charles W. Eliot’s MIT-Har-
v ard merger proposal and, 146–48; est ablishes Latin-Grammar school, 1, 13; ev o lution debates between Louis Agassiz and, 49–56; family of, 2–6, 11–13; final speech and death of, xi; geological nomenclature work with Henry Darwin Rogers, 42–43; Geological Survey of Virginia and, 39–42, 148–49; health of, 105–6, 123–24, 148–52; Humboldtianism and, 32–33, 39, 55; Ralph Huntington and, 110; influence of Maryland Institute on, 1–2; land-grant funds and, 111–17; Lazzaroni and, 67–70, 107–9, 149; marl research and, 34–37; marriage, 31; Massachusetts state appointment and, 102–4; MIT facilities and, 123; MIT Objects and Plan proposal and, 93–100; MIT’s Scope and Plan and, 117–20; MIT’s Society of Arts and, 110–11; mountain chain formation theory with Henry Darwin Rogers, 43–45; National Academy of Sciences and, 107–9, 149–51; natural philosophical work of Henry Darwin Rogers, 45–46; Paris Expo and, 104–6; politics of Geological Survey of Virginia and, 22–25, 37–39; “Polytechnic School” proposal and, 81–84; professorship and life at College of William and Mary, 18–26, 73–74; professorship and life at University of Virginia, 26–31, 74–76; professorship offered by College of William and Mary to, 16, 17–18; recruiting MIT faculty, 120–23; relationship between MIT and approach to science of, xi, 37; resignation and departure from University of Virginia, 30–31; Edmund Ruffin’s Farmer’s Register and, 34–36; Russian model of instruction and, 144–45; Emma Savage’s remarks on Rogers brothers and, 13; “School of Arts” proposal and, 77–79; social and intellectual developments during career of, xii; speaking ability of, x–xi; student years at College of William and Mary, 6–11; summary of career in educational reform, x, 154–57; summary of career in science, x, 153–54; view of museums and laboratories of, 48–49; views on MIT student population, 138–40; views on the reception of MIT, 130–32; Francis Wayland and, 84–85; Yale Report of 1828 and, 76–77

Rollins, John R., 102

Root, Elihu, 155–56

Ross, M. D., 99

Rowland, Henry A., 155

Roxbury, MA, 97

Royal Institution (England), 74

Royal Society of Northern Antiquaries of Copenhagen, 61

Ruffin, Edmund, 8, 34–35, 101

Runkle, John D.; as advocate of Russian system of instruction, 144–45; appointed president of MIT, 124; Charles W. Eliot’s MIT-Harvard merger proposal and, 146–48; as MIT professor, 121; views on coeducation, 141

Rush, Benjamin, 4, 6, 21

Sanborn, Frank, 107

Saturday Club, 151

Savage, Emma, xiii; Boston social life and, 151; in Europe, 62, 105; marriage of, 31; in Newport, 124; remarks on Rogers brothers, 13; Rogers’s death and, 153, 157

Schelling, Friedrich, 50

School of Mines and Economic Geology (London), 88, 96, 120

Scientific American, 125, 132–33

Scudder, Horace E., 135

Scudder, Samuel H., 114

Sedgwick, Adam, 45, 62

Seybert, Adam, 35

Shaler, Nathaniel Southgate, 54, 156

Sheffield Scientific School (Yale): Charles W. Eliot and, 134–35, 147; laboratory instruction at, 156, 178, 24; Rogers and, 131

Silliman, Benjamin, 33, 60, 62, 72
