Concordance to Proper Nouns

All names of persons mentioned in the Romances, whether historical or supernatural, as well as all names of nations, national groups, and places (real or mythical), are entered in this Concordance with a complete list of occurrences. Main entries are written with glottal stops, shown by an H (as distinguished from the HU, which indicates the sound /w/), so that these entries, for comparison, can be more readily located in A Nahuatl-English Dictionary and Concordance to the Cantares Mexicanos (DICT). References to the Romances are by folio and line number: for example, 39v:17 (folio 39 verso, line 17). If the item is also found in the Cantares, a CM appears. In addition to definitions, in some cases, “key words” are given, meaning words or phrases used in the Translation in place of cumbersome glosses, where a particular Nahuatl term has no satisfactory English equivalent. Abbreviations are as follows.

cap., capítulo (chapter)
ch., chapter
