Dr. Susan Meyer works for the US Forest Service as a research ecologist at the Shrub Sciences Laboratory in Provo, Utah. Her specialty is restoration ecology, including seed and seedling establishment ecology and seed propagation of native plants. Past Chair of the Utah Native Plant Society State Board of Directors and one of the founding members of the Intermountain Native Plant Growers Association, she has been studying and photographing Intermountain native plants for forty years. She lives and gardens on a one-acre property in the foothills of southern Utah Valley.

Dr. Roger Kjelgren is Professor of Landscape Horticulture in the Department of Plants, Soils, and Climate at Utah State University in Logan, Utah. He is the Director of the Center for Water Efficient Landscaping, which has been a sponsor of the Intermountain Native Plant Growers Association and the Water Wise Plant Tag Program. Every other year since 1999, he has hosted a Native Plant Symposium at Utah State University, bringing interested people together to confer about the use of native plants in landscaping. He was a contributing author and guiding force for Water Wise: Native Plants for Intermountain Landscapes.
Darrel Morrison is a nationally known landscape architect who specializes in landscape design that is in tune with the surrounding natural environment. He was the lead landscape architect for the Ladybird Johnson National Wildflower Center in Austin, Texas. He is a Professor and Dean Emeritus of the University of Georgia School of Environmental Design and has also taught at Rutgers University (New Jersey), Utah State University (Utah), Conway School of Landscape Design (Massachusetts), and Columbia University (New York). He currently has projects in Montana, Utah, Wisconsin, California, and New York.

William Varga is Extension Horticulturist at Utah State University, where he has statewide responsibilities for outreach in low-water landscaping design. In addition to teaching around the state of Utah, he is involved with developing Utah State University Botanical Center and with other efforts to propagate native plants that have edible, medicinal, ornamental or other potential use for gardens and landscapes. He assists county agents and nursery professionals with information on plant materials for intermountain ecosystems and on the care and culture of these plants. Mr. Varga is also the author of numerous popular articles, research reports, and fact sheets on native intermountain plants.

Bettina Schultz is a stained glass artist whose work has been enriched by her experience with drawing, painting, printmaking, weaving, music, and calligraphy. She is a member of the Utah Native Plant Society and the Intermountain Native Plant Growers Association. As a founding mother of the Utah Heritage Garden Program of the Utah Native Plant Society, she has designed over a dozen native plant demonstration gardens.
