Acknowledgments

The research for and writing of this book were a collective effort that involved a wide network of individuals and institutions beyond those named as authors or contributors.

We first acknowledge the participation, the heart, and the openness of the members of the online affinity networks who let us into their lives during the course of our fieldwork. We hope to show the world what amazing and extraordinary things young people are doing online.

This work was part of a collaborative and interdisciplinary research network, the Connected Learning Research Network (CLRN), and has benefited immensely from the feedback of its members and advisors: Richard Arum, Dalton Conley, Kris Gutiérrez, Ben Kirshner, Sonia Livingstone, Vera Michalchik, Bill Penuel, Kylie Peppler, Nichole Pinkard, Jean Rhodes, Juliet Schor, Julian Sefton-Green, and S. Craig Watkins. Many insights embedded in this book were developed and honed during our regular network meetings. We also want to acknowledge CLRN’s partner network, the Youth and Participatory Politics Research Network (Joseph Kahne, Danielle Allen, Cathy Cohen, Jennifer Earl, Elyse Eidman-Aadahl, Howard Gardner, Henry Jenkins, Lissa Soep, Ethan Zuckerman, and their talented teams), with whom we have maintained close ties throughout this process.

At the Digital Media and Learning Research Hub, housed in the Humanities Research Institute on the University of California, Irvine campus, we would like to thank the communications team (Jeff Brazil, Mimi Ko Cruz, and Jamieson Pond), Assistant Director Claudia Caro Sullivan, Anita Centeno, and Mariko Oda for their administrative support, and Executive Director David Theo Goldberg. We are also grateful for the insights of our former postdoctoral scholars, Melissa Brough and Alexander Cho, who reviewed numerous chapter drafts.

Karen Bleske, in addition to meticulous copyediting and formatting of the entire manuscript, provided invaluable help in integrating the different voices and styles of the contributors. Nat Soti clarified
our thinking by rendering our ideas into beautiful images. At the NYU Press, we acknowledge the support of Eric Zinner, Monica McCormick, and countless others, as well as Julian Sefton-Green’s leadership as editor of the Connected Youth and Digital Future Series. We appreciate the press’s commitment to providing free and open online access to the series books and a platform for our readers to engage with our work.

This project was funded by the John D. and Catherine T. MacArthur Foundation as part of the Digital Media and Learning Initiative, and it has been enriched by the leadership and guidance of Connie Yowell, Julia M. Stasch, Jenn Humke, and Tawa Mitchell at the Foundation.

Like the subject of this book, this project was a highly networked and collaborative enterprise fueled by shared interests and affinity. During the course of five years, the Leveling Up team has gelled into a productive interdisciplinary team, and we have benefited from each other immensely both professionally and personally. Every chapter has been made stronger and more compelling by the input of each of the individual authors, and our understanding and thinking around connected learning have grown with the depth of our friendships. We were all supported by an even broader network of family, friends, and mentors who enriched our thinking and cheered us on. Your numbers are legion, and you know who you are!
