Trip to Nature Center, 105-14
Truancy, 220; girl's story, 184-85
Urawa: school neighborhood, 4-5
Walking group, 15
Yobiko, 202
Praise for Japanese Lessons

“Benjamin distills a year’s worth of detailed observations into a skillful dissection of the Japanese elementary education system. . . . The book’s engaging style and accessibility will appeal to a wide readership.” — Publishers Weekly

“First-person reporting has become prevalent in anthropology and Benjamin does it with unusual coherence, telling not only her story as an American parent and that of her children in dealing with Japanese schools but telling clearly about classrooms, the schools, and their curricula as well. I know of no other book on education that views a school through a mother’s eyes, let alone so interculturally and linguistically sophisticated a set of mother’s eyes. There are lessons here for all of us.” — Frederick Erickson, Director Center for Urban Ethnography University of Pennsylvania
