LIST OF FIGURES

Figure 2.1. The pyramid structure of the elements of national identity ............... 55

Figure 2.2. Local, regional, national, and continent-based identities, 2013 (averages on a 4-point scale) ................................................................................................................. 63

Figure 2.3. Spontaneous affective identification in Europe, 2013 (averages on a 4-point scale) ......................................................................................................................... 63

Figure 2.4. Criteria of national membership: EU regions, Russia and Turkey, 2013 (averages on a 4-point scale) ........................................................................................................ 65

Figure 2.5. The structure of national categorization in Europe: EU regions, Russia, and Turkey, 2013 (average of factor scores) ........................................................................ 67

Figure 2.6. Support for the significance of the eight criteria of national categorization in Europe: EU regions, Russia, and Turkey, 2013 (incidence of significant and highly significant choices, average of indices, max. value is 8). .......... 68

Figure 2.7. Ten sources of national pride in Europe: EU regions, Russia, and Turkey, 2013 (averages on a 4-point scale) .......................................................... 70

Figure 2.8. Symbolic-narrative, modernizing, and postmodern themes of national pride in Europe: EU regions, Russia, and Turkey 2013 (averages on a 4-point scale) ........................................................................................................ 71

Figure 2.9. Ethnocentrism in Europe: EU regions, Russia, and Turkey, 2013 (aggregated average on a 5-point scale) .......................................................... 73

Figure 2.10. The relative weight of ethnocentrism in Europe: EU regions, Russia, and Turkey, 2013 (averaged factor scores) .......................................................... 74

Figure 2.11. Ethnocentrism in Europe: EU regions, 1995–2013 (aggregate averages on a 5-point scale) .......................................................... 75

Figure 2.12. The incidence of shame toward one's nation in Europe, by countries, 2013 (averages on a 5-point scale) .......................................................... 76

Figure 2.13. The incidence of shame felt about one's country in Europe in 1995, 2003, and 2013 (averages on a 5-point scale) ................................................ 77
Figure 2.14. Support for nationalist themes in Europe as a whole, 2013 (averages on a 5-point scale).......................................................... 79

Figure 2.15. The intensity of nationalism in Europe measured by an aggregate index: EU regions, Russia, and Turkey 2013 (averages on 5-point scale).......... 80

Figure 2.16. The penetration of nationalist thought in Europe: EU regions 1995, 2003, 2013 (averages on 5-point scale)............................................................... 81

Figure 2.17. The extent of agreement regarding migration and migrants in Europe: EU regions, Russia, and Turkey together, 2013 (averages on a 5-point scale) .... 83

Figure 2.18. The strength of xenophobia's aggregated index in Europe: EU regions, Russia, and Turkey, 2013 (averages on a 5-point scale)........................................... 84

Figure 2.19. The strength of xenophobia's aggregated index in Europe in a temporal dimension in the EU regions, 1995, 2003, 2013 (averages on a 5-point scale) ...... 85

Figure 2.20. The strength of the aggregated index regarding general xenophobia, including adherence to collective stereotypes about immigrants and the support of anti-immigrant policies in Europe: EU regions, Russia, and Turkey, 2013 (averages on a 5-point scale).......................................................................................... 86

Figure 2.21. The factor structure of agreement with statements concerning the acceptance of migrants in Europe: EU regions, Russia and Turkey, 2013 (averages of factor scores) .......................................................... 87

Figure 2.22. Standard deviation of standpoints concerning immigrants’ assimilation versus letting immigrants preserve their customs: EU regions, Russia and Turkey, 2013 (percentages).......................................................... 88

Figure 2.23. Nationalism’s path-model of linear regression in the EU countries, ISSP 2013........................................................................................................ 89

Figure 2.24. The path-model of linear regression for Russian nationalism, 2013 ..........91

Figure 2.25. The path-model of linear regression for Turkish nationalism, 2013 .......92

Figure 2.26. Types of national identity in the EU regions, regional distribution of clusters, 2003 (percentages)........................................................................................................ 94

Figure 2.27 Types of national identity in the EU regions, Russia and Turkey, regional distribution of clusters, 2003 (percentages)................................................. 95

Figure 2.28. Support for the EU in the member states, measured by three questions 2013 (averages on a 5-point scale) ................................................................................ 96
Figure 2.29. Cluster typology concerning the EU’s support in the EU region, 2013 (percentages) ........................................................................................................... 98

Figure 2.30. The aggregated index of the EU’s support, 2013 (index averages of the regions) ................................................................................................................ 100

Figure 2.31. The aggregate index of EU’s support, 2003 and 2013 (averages of the regional indices) ............................................................................................................. 100

Figure 2.32. The linear regression path-models of the EU’s member countries ......101

Figure 3.1. The level of rejection of (or prejudice against) four groups by country, GFE data, 2008 (averages on a 4-point scale) ........................................................................... 114

Figure 3.2. The correlation matrix of group rejection (prejudice) in the shared space of the countries surveyed*, GFE data, 2008 ................................................................. 115

Figure 3.3. The intensity of anti-immigrant attitudes in fifteen countries, ISSP data, 2003 (averages on a 5-point scale) .................................................................................. 121

Figure 3.4. The intensity of extreme repudiation of groups (prejudice) by country, GFE data, 2008 (percentages) ................................................................. 127

Figure 3.5. Concentration of the various themes in a multidimensional space......131

Figure 3.6. Two patterns of Islamophobia in eight European countries, GFE data, 2008 (factor score averages) .......................................................................................... 132

Figure 3.7. Groups representing the four patterns of Islamophobia in eight European countries, GFE data, 2008 (percentages) .................................................. 133

Figure 3.8. The distribution of four types of Islamophobic groups in eight European countries (percentages) ................................................................. 134

Figure 3.9. shows the distribution of the four cluster groups produced on the basis of xenophobia and Islamophobia ................................................................. 135

Figure 3.10. The distribution of four cluster groups formed of Islamophobia and xenophobia in eight European countries (percentages) ................................. 136

Figure 3.11. The two types of GFE (new and traditional) in eight European countries (averages of the principal component) ...................................................... 138

Figure 4.1. The portion of family unification (percent) in all migration cases (million persons) in the period between 1995 and 2001 ................................. 151

Figure 4.2. The size of global migration flow over the period between 1960 and 2015 (million persons) ........................................................................... 153
Figure 4.3. The size of international migration in eight EU countries in the period between 1960 and 2015 (million persons) .................................................... 157

Figure 4.4. Migration strategies and the referential spaces of successful migration ............................................................................................................. 165

Figure 4.5. The length of stay in Hungary by the ethnicity of the migrant group (percentages) .................................................................................................................. 167

Figure 4.6. Need expressed to obtain Hungarian citizenship, by ethnicity of migrant group (percentages) .............................................................................................. 167

Figure 4.7. The composition of migrant groups according to educational attainment (percentages) ............................................................................................. 168

Figure 4.8. The mobility trajectory of migrants in the new county, according to ethnicity (percentages) ............................................................................................. 169

Figure 4.9. The social distance felt toward Hungarians, according to ethnicity of migrant group (scale averages*) .............................................................................. 171

Figure 4.10. The level of trust expressed toward Hungarians, one's own migrant group, and one's fellow countrymen left behind, by ethnicity of migrant group (averages on a 5-point scale) ............................................................. 172

Figure 4.11. Experiencing discrimination due to migrant status, according to the migrants' ethnicity of (in percentages) ............................................................. 174

Figure 4.12. Proficiency in the Hungarian language, according to the migrants' ethnicity (in percentages) ............................................................................................. 174

Figure 4.13. Willingness to integrate into national society: choice of school for children according to ethnicity of migrants (in percentages) ........................... 175

Figure 4.14. Frequency of communication with relatives in the home country, by the ethnicity of migrants (in percentages) .......................................................... 176

Figure 4.15. Observance of Hungarian national holidays and holidays of the home country, by ethnicity of migrants (in percentages) .................................................. 176

Figure 4.16. Types of cultural and symbolic attachment by ethnicity of migrants (in percentages) ............................................................................................. 177

Figure 4.17. The ethnic composition of migrants' social networks, by ethnicity (in percentages) ............................................................................................. 178
Figure 4.18. Migration strategies by ethnicity of migrant groups (percentages) ...........181

Figure 4.19. The level of general and extreme xenophobia in eight European countries in proportion to the entire sample (percentages) ................................................. 186

Figure 4.20. Types of migrants in six European countries (percentages) ............... 194

Figure 4.21. Assessment of the difficulties of integration by the host society and by migrants in six countries of Europe, 2008 (averages on an 11-grade scale) ........195
