About the Institute

The W.E. Upjohn Institute for Employment Research is a nonprofit research organization devoted to finding and promoting solutions to employment-related problems at the national, state, and local levels. It is an activity of the W.E. Upjohn Unemployment Trustee Corporation, which was established in 1932 to administer a fund set aside by Dr. W.E. Upjohn, founder of The Upjohn Company, to seek ways to counteract the loss of employment income during economic downturns.

The Institute is funded largely by income from the W.E. Upjohn Unemployment Trust, supplemented by outside grants, contracts, and sales of publications. Activities of the Institute comprise the following elements: 1) a research program conducted by a resident staff of professional social scientists; 2) a competitive grant program, which expands and complements the internal research program by providing financial support to researchers outside the Institute; 3) a publications program, which provides the major vehicle for disseminating the research of staff and grantees, as well as other selected works in the field; and 4) an Employment Management Services division, which manages most of the publicly funded employment and training programs in the local area.

The broad objectives of the Institute’s research, grant, and publication programs are to 1) promote scholarship and experimentation on issues of public and private employment and unemployment policy, and 2) make knowledge and scholarship relevant and useful to policymakers in their pursuit of solutions to employment and unemployment problems.

Current areas of concentration for these programs include causes, consequences, and measures to alleviate unemployment; social insurance and income maintenance programs; compensation; workforce quality; work arrangements; family labor issues; labor-management relations; and regional economic development and local labor markets.
“Individual accounts are often debated in a vacuum—unrelated to any real world experience. John Turner, one of the nation’s foremost experts on Social Security, does a masterful job of making us look at the experience with accounts already offered in many countries—but in many different sizes, shapes, forms, and levels of risk. Whether you like accounts or not, you’d better read Dr. Turner’s book if you want to engage in the Social Security debate in any serious way.”

—C. Eugene Steuerle, senior fellow, Urban Institute

“The United States is engaged in the most significant debate over Social Security that it has had in 50 years. Fortunately, it doesn’t have to rely on abstract analysis or ideological arguments. Other countries have had experience with the types of reforms we are considering. This very readable book provides a valuable reference for people interested in learning about international experience relevant to the U.S. Social Security reform debate.”

—Ron GebhardtSBauer, FSA, MAAA, senior pension fellow, American Academy of Actuaries
