As with every such project, I am extremely grateful to the large number of people who contributed to the making of this book.

Grayson Williams spent hours running documents through a scanner that seemed unable to perform its job as well as he did his, exercised his patience and research skills in tracking down sources of documents published decades ago, and managed to make both endeavors seem like fun. My thanks go to him and to the many people who were so helpful with sources and permissions: Judith Mellins and David de Lorenzo of the Manuscripts and Archives Division of the Harvard Law School Library; Janet Hodgson, of the University of Louisville Archives, who has been aiding me in one way or another for more years than either of us can remember; Franz Jantzen, of the Office of the Curator, Supreme Court of the United States; Jessica Kaz, of the Jewish Historical Society, Washington, D.C.; and the staff of the Prints and Photographs Division of the Library of Congress.

Alice Brandeis Popkin has treated me to memories and hours of good conversation and laughter in addition to her grandfather's letters, and she has my warm thanks.

The staff of the University Press of Kansas is an author's dream. I would like, once again, to thank Fred Woodward, its director; Susan McRory, senior production editor; and Susan Schott, marketing manager.

David W. Levy and Melvin I. Urofsky are deservedly well known for the now-classic volumes of Brandeis letters they meticulously unearthed, transcribed, edited, and annotated. They learned so much about Brandeis in the process that I cannot imagine publishing anything about him without showing it to them first. They each worked their way through this volume, repeating what they had done for my earlier study, Brandeis: Beyond Progressivism, commenting copiously, correcting my more egregious factual, grammatical, and stylistic errors, and making the kind of helpful suggestions that can come only
from experts. That does not mean that they agree with my choice of documents or everything I have written. Their time and effort reflected a devotion to scholarship and a sense of collegial community that has been enormously important to me and equally available to other Brandeis scholars.

They have fulfilled the tasks I have inflicted upon them with great good humor—some of their comments, in fact, are better left unprinted—and we have become friends in the process. Dedicating this book to them is an insufficient but heartfelt expression of my gratitude.
