List of Figures and Tables

Figure 1.1  Location of the African Farming Network partner projects.  
Source: M. Davies

Figure 1.2  Fields and irrigation in Tot-Sibou, northern Marakwet. The map shows main clan boundaries (Shaban, Kapishoi, Kapsiren, Kapchepsom), the irrigation furrow of Kapishoi clan, the semi-permanent fields (grid pattern bottom centre), areas of shifting cultivation (circled right of centre), areas of riverside flood recession cultivation (circled around water courses) and the habitation zone (bottom left). Source: M. Davies

Figure 1.3  An abandoned Tiv house platform at Ushongo Hill. Photograph: M. Davies

Figure 1.4  A stonewalled Bokoni homestead in Mpumalanga, South Africa. Photograph: G. Williams (2011). Courtesy A. Schoeman

Figure 2.1  A map of Tanzania showing the location of the Mtwara region.  
Source: Leonard Masanja, Geographical Information Systems (GIS) Unit, Stella Maris Mtwara University College

Figures 2.2 & 2.3  A scatter of a cat carcass (left) and goat bones (right) slaughtered in the graveyards at Mvita ancient settlement. Photograph: F. Gabriel (2013)

Figure 2.4  Makonde dancers traditionally dressed in bark-cloth.  
Photograph: F. Gabriel (2013)

Figure 3.1  Map of Pangani Bay showing excavated trenches. Source: E. Mjema

Figure 3.2  The stratigraphic sequences at Kimu site as shown by the eastern wall profile of trench K1. Source: E. Mjema

Figure 3.3  Swahili and Zanjian pottery. Motif K exists in pottery from both phases.  
Source: E. Mjema

Figure 3.4  The distribution of occupational phases in Pangani Bay as revealed by excavation trenches from Kimu and Muhembo sites. ZP = Zanjian phase, SW = Swahili and PS = Post-Swahili. Source: E. Mjema
List of Figures and Tables

**Figure 3.5** Different pottery shapes identifiable from Zanjian and Swahili phases at Pangani Bay sites. a = necked jars, b = globular jars, c = open bowls, d = closed bowls, e = carinated bowls, f = bowl with beaded rim. Source: E. Mjema

**Figure 3.6** Frequency of major vessel shapes in Zanjian and Swahili phases. Source: E. Mjema

**Figure 3.7** Frequency variability of vessel motifs in Zanjian and Swahili phases (Motif F = white or grey slip that is applied on exterior or interior or both surfaces of the vessels. Motif K = a horizontal succession of punctuates that form a single line motif). Source: E. Mjema

**Figure 3.8** Bead shapes. Source/Courtesy: M. Wood (2005)

**Figure 3.9** Frequency of major bead shapes in Zanjian and Swahili phases. Source: E. Mjema

**Figure 3.10** Shellfish common in Zanjian and Swahili phases. a = *Terebralia palustris* (mud whelk), b = *Cerithidea decollata*, c = *Saccostrea cucullata*, d = *Anadara* spp., e = *Cypraea annulus/moneta*, f = *Polinices mammilla*, g = *Achatina* sp. (landsnail). Source: E. Mjema

**Figure 4.1** The Bassar region of northern Togo. Source: J. Paulson

**Figure 4.2** The Bassar region showing iron-working villages at contact (1890s). Source: P. de Barros & J. Paulson

**Figure 4.3** Iron bloom crusher or pounder made of quartzite at site 312 near Bidjobebe. Note large cylindrical crushing mortar produced by the long-term action of this tool. Pen and 50 cm tape shown for scale. Photograph: P. de Barros (1981)

**Figure 4.4** Smaller spheroidal hammer for pulverising smaller bloom fragments and small saucer mortars its action produces over time (site 312). Photograph: P. de Barros (1981)

**Figure 4.5** Deep cylindrical mortar surrounded by numerous small mortars and a variety of conical and ellipsoid mortars, basins and slicks (feature T, site 299A, Bidjomambe). Photograph: P. de Barros (2013)
**Figure 4.6** Intensively used outcrop at site 298A (Bitchabe) showing deep cylindrical mortars, conical to ellipsoid basins and mortars, smaller saucer mortars and shallow slicks. Photograph: P. de Barros (2013)

**Figure 4.7** Iron bloom crushing mortar sites (*likumanjool*) discussed in the text. Source: J. Paulson

**Figure 4.8** Site 312 *likumanjool* near Bidjobebe. Source: J. Paulson

**Figure 4.9** Site 298A *likumanjool* near Bitchabe. Source: J. Paulson

**Figure 4.10** Site 298B *likumanjool* near Bitchabe. Source: J. Paulson

**Figure 4.11** Site 299A *likumanjool* near Bidjomambe. Source: J. Paulson

**Figure 4.12** Ten stone axe polishing grooves, outcrop J, site 298B near Bitchabe. Photograph: P. de Barros (2013)

**Figure 4.13** Two metal tool sharpening surfaces, with feature 96 on top of stone axe polishing groove, outcrop A, site 298A near Bitchabe. Photograph: P. de Barros (2013)

**Figure 4.14** Ovoid mortars at site 320, outcrop A. Photograph: P. de Barros (2013)

**Figure 4.15** Reused and deepened ovoid mortars at site 359, outcrop E. Photograph: P. de Barros (2013)
