Human remains and mass violence
HUMAN REMAINS AND VIOLENCE

*Human remains and violence* aims to question the social legacy of mass violence by studying how different societies have coped with the dead bodies resulting from war, genocide and state-sponsored brutality. However, rather paradoxically, given the large volume of work devoted to the body on the one hand, and to mass violence on the other, the question of the body in the context of mass violence remains a largely unexplored area and even an academic blind spot. Interdisciplinary in nature, *Human remains and violence* intends to show how various social and cultural treatments of the dead body simultaneously challenge common representations, legal practices and morality. This series aims to provide proper intellectual and theoretical tools for a better understanding of mass violence’s aftermaths.
