Figures

1.1 Fragmentary news reports of smallpox outbreaks from EP districts of smallpox, *Pakistan Observer*, 23 February 1958. News reports were a source of outbreak intelligence that travelled faster than the EP Health Department’s passive surveillance.  

4.1 The graph in Kim (1985), showing the importance of changing the target population.  

11.1 T-shirt produced for the polio vaccination team members.  

11.2 Cover of DVD, Polio: *Cuta ko Kariya?*  

Tables

1.1 Major donors of smallpox vaccine to East Pakistan, spring 1958.  

8.1 Vaccine schedules in Japan and the United States, 2011.
8.2 Approvals of Japan’s first combination vaccine with a polio component. 219
8.3 Adverse events following the introduction of MMR in 1989. 221
11.1 Cases of acute flaccid paralysis (AFP) and confirmed cases of wild poliovirus and circulating vaccine-derived poliovirus, Nigeria, 1999–2015. 299
