Acknowledgements

This volume would not exist without the work and support of many people whom we thank here. It is based on the manifold contributions of the participants of the 7th biannual conference of the Medical Anthropology At Home (MAAH) network held in 2012 in Driebergen, The Netherlands. The chapters themselves and the selection of the contributions more generally have greatly benefited from the intense engagement of the participants who read all presented papers ahead of the conference and advanced our discussions as discussants and through their critical questions and comments. We thank Rosalijn Both and Christopher Pell who were of tremendous help in organizing the conference. We also wish to acknowledge several individuals whose help has been essential for the further editorial process: Erin Martineau for her careful proofreading and copyediting, and Floortje Opbroek for making the index. Martine de Rooij and Hayley Murray have provided invaluable assistance in pulling together the volume and getting done the final manuscript preparation. Finally, we would also like to thank Jaap Wagenaar, our editor at Amsterdam University Press, for the extended support.
