Acknowledgements 15

1 The Educational Mobility of the European Second Generation 19
   A Three-Country Comparison
   1.1 Introduction 19
   1.2 Ethnic educational inequalities: A theoretical framework 20
   1.3 Research questions and design 27
   1.4 Structure of the book 37

2 The Worlds of Turkish Fathers and Mothers 41
   2.1 Introduction 41
   2.2 Periods of Turkish immigration to Austria, France and Sweden 41
   2.3 Policy responses by the three receiving countries 48
      2.3.1 Austria 49
      2.3.2 France 50
      2.3.3 Sweden 51
   2.4 Turkish immigrants in five urban destinations 52
   2.5 Comparing the relative positions of the parental generation across five cities 60
   2.6 Conclusion 67

3 An Initial Look at Education Outcomes 71
   3.1 Introduction 71
   3.2 Education levels reached by young adults in Austria, France and Sweden 71
   3.3 Accounting for compositional differences 80
   3.4 Inter-generational educational mobility 83
   3.5 Conclusion 86

4 Behind the Scenes: The Family Examined 89
   4.1 Introduction 89
   4.2 Parental involvement as social capital 90
   4.3 Older siblings’ involvement as social capital 106
   4.4 Do Turkish families muster more family support for education? 111
   4.5 Conclusion 116
5 Beyond the Family: Peers and Teachers  
5.1 Introduction  
5.2 Social relationships with peers and teachers  
5.3 Peer group characteristics of the Turkish second generation  
5.4 Student-teacher relationships among the Turkish second generation  
5.5 Peers and teachers as mediating actors in processes of educational attainment  
5.6 Differences between the comparison group and second-generation Turks  
5.7 Conclusion

6 Navigating the System  
6.1 Introduction  
6.2 Education pathways compared – the perspective on institutional arrangements  
6.2.1 France  
6.2.2 Sweden  
6.2.3 Austria  
6.3 Conclusion

7 Interactions between Individual-level and Institutional-level Factors  
7.1 Introduction  
7.2 What causes inequalities in education careers within systems?  
7.2.1 France  
7.2.2 Sweden  
7.2.3 Austria  
7.3 The relevance of educational resources for mobility in education  
7.4 Conclusion

8 Explaining Cross-national Differences in Educational Mobility  
8.1 Introduction  
8.2 Cross-national and cross-city differences in educational mobility  
8.3 Explaining differences in educational mobility  
8.4 Interactions between individual-level and institutional-level factors
Appendix

PART A

Survey samples, response rates and weights 221
1 The TIES survey in Austria, France and Sweden 221
2 Comparing the TIES survey with reference data 226

PART B

Measurement, analysis strategies and additional outcomes 233
2 The Worlds of Turkish Fathers and Mothers 233
3 An Initial Look at Education Outcomes 234
4 Behind the Scenes: The Family Examined 239
5 Beyond the Family: Peers and Teachers 247
6 Navigating the System 250
7 Interactions between Individual-level and Institutional-level Factors 251

Bibliography 257

Other IMISCOE Research titles 273
List of Figures and Tables

Figures

Figure 2.1  Region of origin of the parental generation, by city  55
Figure 2.2  Percentage distribution of job status in quartiles of the ISEI index, parental generation, by city (%)  63
Figure 2.3  The parental generation's host country language ability, by city (%)  64
Figure 3.1  Differences in education outcomes before ('gross') and after ('net') controlling for parents' education levels, by city (odds ratios)  79
Figure 3.2  Long-range upward mobility in second-generation Turks, by city (%)  85
Figure 4.1  Mean and percentage distribution of the main indicators of parental support, by city  93
Figure 4.2  Predicted probability of leaving school early for second-generation Turks, by city and parental support index  102
Figure 4.3  Predicted probability of achieving a post-secondary/tertiary education for second-generation Turks, by city and parental support index  105
Figure 4.4  Mean and percentage distribution of the main indicators of sibling support, by city  106
Figure 4.5  Predicted probability of leaving school early for second-generation Turks, by city and sibling support index  110
Figure 4.6  Predicted probability of achieving post-secondary/tertiary education for second-generation Turks, by city and sibling support index  111
Figure 5.1  Perceived importance of peers in supporting studies  124
Figure 5.2  Mean and percentage distribution of the main indicators of student-teacher relationships, by city  129
Figure 6.1  Outflow rates for France (Paris and Strasbourg), by group (%)  147
Figure 6.2  Outflow rates for Sweden (Stockholm), by group (%)  152
Figure 6.3  Outflow rates for the comparison group in Austria (Vienna and Linz) (%)  158
Figure 6.4 Outflow rates for the Turkish second generation in Austria (Vienna and Linz) (%) 159
Figure 7.1 Predicted probability of continuing in the academically orientated tracks at different transition points for the Turkish second generation and the comparison group in France 175
Figure 7.2 Predicted probability of continuing in the academically orientated tracks at different transition points for the Turkish second generation and the comparison group in Sweden 179
Figure 7.3 Predicted probability of continuing in the academically orientated tracks at different transition points for the Turkish second generation and the comparison group in Austria 185

Tables

Table 1.1 The main structural characteristics of education systems in Sweden, France and Austria 30
Table 1.2 Total numbers per group and per city in Austria, France and Sweden 33
Table 1.3 Age and gender distribution according to group and city 34
Table 1.4 Levels of comparison conducted in this study 36
Table 2.1 Numbers of Turkish citizens in Austria, France and Sweden in 1973, 1982, 1990 and 2006 47
Table 2.2 Years of immigration of the parental generation, by city (%) 54
Table 2.3 Provinces of origin of the parental generation according to degree of development, by city (%) 57
Table 2.4 Ethnic and religious composition of the parental generation, by city (%) 59
Table 2.5 Lowest and highest levels of education among the Turkish parental generation, by city (%) 61
Table 2.6 Family structure of the parental generation, by city (%) 66
Table 2.7 Schematic summary of the relative position of the first-generation Turks, by city 68
Table 3.1 Education levels of second-generation Turks and the comparison group, by city (%) 73
Table 3.2 Parents’ levels of education, by group and city (%) 77
Table 3.3 Ordered logistic regression of education levels (odds ratios) 82
Table 3.4  Inter-generational educational mobility of the Turkish second generation, by city (%)  
Table 4.1  Parental involvement measures in the TIES survey  
Table 4.2  Correlations between the dimensions of parental support and family characteristics  
Table 4.3  Early school leaving and achieving post-secondary/tertiary education, by group and city (%)  
Table 4.4  Binomial logistic regression of leaving school early for second-generation Turks (odds ratios)  
Table 4.5  Binomial logistic regression of achieving post-secondary/tertiary education for second-generation Turks (odds ratios)  
Table 4.6  Correlations between the dimensions of sibling support and family characteristics  
Table 4.7  Importance of parental and sibling support during compulsory school, by group and city  
Table 4.8  Binomial logistic regression of achieving post-secondary/tertiary education (odds ratios)  
Table 4.9  Interaction effects of family support and the second generation (odds ratios)  
Table 5.1  Ethnic composition of ‘street’ and ‘school’ peer groups, by city (%)  
Table 5.2  Correlations between the ethnic composition of peer groups and perceived school segregation  
Table 5.3  Peers without a diploma, by city (%)  
Table 5.4  Binomial logistic regression of achieving post-secondary/tertiary education for second-generation Turks controlled for peer characteristics and student-teacher relationships (odds ratios and % change in odds)  
Table 5.5  Binomial logistic regression of achieving post-secondary/tertiary education for second-generation Turks, controlled for peer characteristics, student-teacher relationships and parents’ education and support (odds ratios and % change in odds)  
Table 5.6  Peer group and teacher characteristics for the comparison group and second-generation Turks, by city (means; %)  
Table 5.7  Significant findings on achieving post-secondary/tertiary education for both groups (odds ratios and % change in odds)
Table 6.1 Pre-school attendance in Paris and Strasbourg, by group (% and age) 145
Table 6.2 Typology of education pathways in Paris and Strasbourg, by group and city (%) 150
Table 6.3 Pre-school attendance in Stockholm, by group (% and years) 151
Table 6.4 Typology of education pathways in Stockholm, by group (%) 153
Table 6.5 Pre-school attendance in Vienna and Linz, by group (% and age) 155
Table 6.6 Typology of education pathways in Vienna and Linz, by group and city (%) 161
Table 6.7 Favourable and unfavourable conditions and practices for upward mobility in education 164
Table 7.1 Analytical strategy for analysing education pathways 167
Table 7.2 Multinomial logistic regression of track chosen in upper-secondary education in France (odds ratios) 170
Table 7.3 Binomial logistic models of continuing in post-secondary/tertiary education in France (odds ratios) 173
Table 7.4 Binomial logistic regression predicting track placement at the transition to upper-secondary and tertiary education in Sweden (odds ratios) 177
Table 7.5 Binomial logistic regression predicting track placement at the first transition to lower-secondary education in Austria (odds ratios) 180
Table 7.6 Conditional multinomial logistic regression predicting track placement at the transition to upper-secondary education in Austria (odds ratios) 182
Table 7.7 Binomial logistic regression predicting the transition into tertiary education in Austria (odds ratios) 184
Table 7.8 Main education routes for second-generation Turks in Austria, France and Sweden 187
Table 7.9 Overview of individual-level factors (independent variables) 189
Table 7.10 Schematic overview of significant correlations between individual-level factors and education pathways for second-generation Turks in Austria, France and Sweden 191
Table A1 Main characteristics of the TIES samples in Austria, France and Sweden 224
<p>| Table A2 | Educational attainment and selected occupations of the Turkish first generation compared: Austrian Census and TIES samples in Vienna and Linz (%) | 228 |
| Table A3 | Educational attainment of the Turkish second generation (aged 20-26 years) compared: LiZW and TIES samples in Vienna and Linz (%) | 229 |
| Table A4 | Educational attainment of the Turkish first generation compared: Family History Survey and TIES samples in Paris and Strasbourg (%) | 231 |
| Table A5 | Educational attainment of the Turkish second generation compared: TeO Survey and TIES samples in Paris and Strasbourg (%) | 232 |
| Table A6 | Three main reasons for migration from Turkey, fathers (%) (Chapter 2, Section 2.4) | 233 |
| Table A7 | Three main reasons for migration from Turkey, mothers (%) (Chapter 2, Section 2.4) | 233 |
| Table A8 | Respondents still in school, by city and group (%) (Chapter 3, Section 3.1) | 234 |
| Table A9 | EDU Codes classification for Austria, Sweden and France (Chapter 3, Section 3.1) | 234 |
| Table A10 | Descriptive outcomes of main independent variables (mean, standard deviation) – second-generation Turks by city (Chapter 3, Section 3.3) | 237 |
| Table A11 | Ordered logistic regression on education level (Chapter 3, Section 3.3) | 238 |
| Table A12 | Descriptive outcomes of independent variables, by group and city (Chapter 4, Section 4.2) | 241 |
| Table A13 | Binomial logistic regression of leaving school early for second-generation Turks (odds ratios) – sibling support, by country (Chapter 4, Section 4.3) | 244 |
| Table A14 | Binomial logistic regression of achieving post-secondary/tertiary education for second-generation Turks (odds ratios) – sibling support, by country (Section 4.3) | 246 |
| Table A15 | Characteristics of education pathways in Vienna and Linz, by group (%) | 250 |
| Table A16 | Characteristics of education pathways in Paris and Strasbourg, by group (%) | 251 |
| Table A17 | Classification of education routes as a dependent variable for Section 7.3 | 252 |</p>
