Firstly, I would like to thank the Section d'histoire et esthétique du cinéma at the Université de Lausanne, the Sandoz Family Foundation, and the TECHNÈS International Research Partnership on Film Techniques and Technologies.

This volume took shape through research carried out under the aegis of the Lausanne section's research group 'Dispositifs', led by Maria Tortajada. In this sense, it enters into dialogue in particular, explicitly or implicitly, with the individual or joint work of François Albera and Maria Tortajada. I can only thank them as warmly as possible for their availability and interest and for the exactingness and amiability they always demonstrated in our intellectual exchanges.

Some underlying elements of the ideas found in this volume took root in a doctoral seminar at Université Paris 8 Vincennes – Saint-Denis that I participated in several years ago, when I was developing my doctoral dissertation. This seminar was led by Guy Fihman and Claudine Eizykman and I extend my thanks to them here.

The TECHNÈS framework has also been important for the development of this book. I would like to thank, in particular, Santiago Hidalgo and André Gaudreault for their sustained enthusiasm.

Very warm thanks to Werner Nold, who worked as a film editor at the National Film Board of Canada for more than 30 years, and to his wife Lucette Lupien. Our discussions were fascinating, their information was irreplaceable, the machines were splendid, and our friendship invaluable.

My thanks also for responses to my questions from: Jean-Marc Lamotte, head of the heritage department at the Institut Lumière in Lyon; to Laurent Mannoni, director of cultural heritage and conservation of cinematographic technology at the Cinémathèque française; to Marie-Sophie Corcy, head of collections in the field of communication at the Musée des Arts et Métiers; and to Todd Gustavson, director of the collection of devices at the George Eastman House, now the George Eastman Museum.

Finally, my thanks, once again, to Caroline Zéau, for everything.
