Shyness through the battlefield

/ a ghostly emergence in the jungle / trismegistus
32 m high / sombre reverb shadows negotiating the
right distance / between flirtation and repulsion / feeding and
fighting // a silent war // between proto computational
negligible void of a tropical forest // do not touch me
// pheromonal // reciprocally
unstable equilibrium / no status quo / in this latent conflict / with power
without accomplishment / a toxic void / allelopathic chemistry / crown shyness tension /

Allelopathy (also called 'crown shyness'), etymologically, "to suffer from each other," is the active or passive effect of chemicals released into the environment influencing the growth, survival and reproduction of other organisms.

Pp. 90-91, point cloud model from a 3D laser scanning of the jungle (extract).
