Brown Judaic Studies has been publishing scholarly books in all areas of Judaic studies for forty years. Our books, many of which contain groundbreaking scholarship, were typically printed in small runs and are not easily accessible outside of major research libraries. We are delighted that with the support of a grant from the National Endowment for the Humanities/Andrew W. Mellon Foundation Humanities Open Book Program, we are now able to make available, in digital, open-access, format, fifty titles from our backlist.

William Hallo was one of the foremost biblical scholars of his generation. In The Book of the People (1991), Hallo presents an accessible introduction to the Torah, read within the context of its origins in the Ancient Near East. This edition contains some corrections of the original text.
