The numerous editions and early translations produced throughout the eighteenth century enabled the broad dissemination of Emer de Vattel’s juridical-political work *Droit des gens*. This book investigates the global impact of the *Droit des gens* with regard to the different political realities, the historical and legal contexts as well as the attempts, mechanisms and strategies used to put these ideas into practice and establish new doctrine between the eighteenth and nineteenth centuries.
Global Perspectives on Legal History is a book series edited and published by the Max Planck Institute for European Legal History, Frankfurt am Main, Germany. As its title suggests, the series is designed to advance the scholarly research of legal historians worldwide who seek to transcend the established boundaries of national legal scholarship that typically sets the focus on a single, dominant modus of normativity and law. The series aims to privilege studies dedicated to reconstructing the historical evolution of normativity from a global perspective. It includes monographs, editions of sources, and collaborative works. All titles in the series are available both as premium print-on-demand and in the open-access format.
