List of Figures

All photos and diagrams by the author.

Figure 0.1 A view of the core city area of apartments surrounded by expansive areas of ger districts. The ger districts expand considerably beyond what is shown in the photo. 2

Figure 1.1 The cyclic system that underpins the issuing of 8 per cent interest mortgages. This system connects the Central Bank of Mongolia, participating commercial banks, house buyers and the Mongolian Mortgage Corporation (MIK). 40

Figure 2.1 An older, self-built house containing new improvements sits on a piece of land owned by the same person for several decades. This land sits in close proximity to new developments. 58

Figure 2.2 Land in a part of the city has been cleared of fenced land plots (hashaa). However, only a few apartment blocks have been completed in their place during a period of economic flux. 59

Figure 2.3 A room filled with waste has also had its heating pipes and radiator removed, and the glass taken from the window. 68

Figure 2.4 Residents maintain a cleaner space on the landing of the second floor of their building. The sign reads: ‘Do not dispose of rubbish! Penalties apply.’ 69

Figure 3.1 A meeting announcement on a doorway. 87
Figure 3.2  On the day of the gathering, the notice had been anonymously torn down as well.  88

Figure 4.1  Bayar’s ger on her land, with a view overlooking the city.  116

Figure 5.1  Tsogoo ‘proves’ the quality of a tile to me by revealing its underside, embossed with the Versace brand name.  129

Figure 5.2  Tsogoo shows me the piping and valves behind the building’s internal heating infrastructure as proof of their quality, revealing another European brand.  130

Figure 5.3  Promissory infrastructure: new sewerage pipes are laid north of the city, alongside expansive numbers of land plots not connected to core infrastructure.  138
